

APP SOUND

Cosmic Circuits is a premium sound pack for the Korg multi/poly and the Korg multi/poly native.

It includes 64 expertly crafted Performances (bundled as set list), designed by Christian Gritzner and Matthias Sauer, covering a wide range of styles — from Electronic, Chillout, and Ambient to Retro Pop, Game Music, and beyond.

Each Performance is carefully programmed to showcase the sonic depth and versatility of the Korg multi/poly, delivering expressive, production-ready sounds for modern and vintage-inspired music alike.

Cosmic Circuits is an unique sound library for the Korg multi/poly synthesizer, blending modern electronic aesthetics with vintage character, Berlin School influences, and cinematic depth — perfect for ambient, electronic, synthwave, and other productions that call for classic, fat, and soaring synthesizer sounds. You'll find classic analog and PPG-style synthesizers, along with a variety of wavetable sounds, newly reimagined for a cosmic journey with the Korg multi/poly.

Experience a unique fusion of vintage character and modern electronic sound design.

We hope our Cosmic Circuits library — along with our other sound packs — inspires you and fuels your creativity in countless musical projects.
