

VINTAGE VISION is a sound pack with 70 new brilliant preset patches for the Behringer PRO-800. Welcome to a serious bank with very useful sounds for synthesists and keyboard player.

The presets have been programmed by two veteran programmers. With Vintage Vision they celebrate their first team work: Christian Gritzner and Matthias Sauer. Chris is an experienced sound designer who has already created several sound sets for the well-known German company Waldorf. Matthias, owner of APP SOUND, started with the SCI Prophet 600 (back in the late 80ies) and created numerous sounds for Yamaha, Roland, Korg and other companies.

VINTAGE VISION is full of analog basses, pads, leads, and much more. Sounds that seem to come from vintage times but they also build a bridge to the needs of modern composition.

The presets are well playable via a MIDI keyboard or in a sequencer setup. They react to aftertouch and modwheel action. All these musically presets of Vintage Vision were carefully designed by Chris and Matt. You find a list of all 70 presets below.

Content

- Set of 70 sound presets for the Behringer PRO-800
- Presets include ModWheel and Aftertouch assignment
- Over 50 MIDI Phrases (mostly four bars for each phrase)
- Over 10 bonus demo phrases (as used in the product demo)
- Styles: Retro, Ambient, Cinematic, Lounge, Pop, Funk, Rock, Progrock, Chillout, Classical, Electronic, IDM, Jazz, Trance, and others.

About using effects

The Behringer Pro-800 has no stereo output (such as the SCI Prophet-600 and many other analog vintage synths). You can get a stereo panorama with different external effects (hardware, software) like a chorus, stereo delay or stereo reverb. Try this for pads, keys, leads, etc. Delay effects are often cool with leads, basses and sequenced sounds – just experiment with changing the delay times.

Freeware Tip: Valhalla Supermassive

You don't need a high-end effect device or expensive FX plugins. Just use the free Valhalla Supermassive as a plugin in your DAW. You can easily optimize our 70 presets by using Supermassive (as we did it with our audio demos and the demo presets you hear in the product video).

Phrases included

You get two folders with additional MIDI phrases (please select the right preset

and tempo - included in the file name).

Preset Phrases: musical templates, how to use this single presets.

Demo Phrases: phrases incl. MIDI Control - we used them for the product video and audio demo of Vintage Vision.

How to install

You get the product by mail / download link. The ZIP archive contains one folder („Behringer_Pro800_VintageVision“) with 70 new presets (Bank D) in sysex format (.syx).

It's easy to install the sound pack: Connect the Behringer Pro-800 with your computer via USB. Then launch the Swumpf Pro-800 Controller which you use with your browser: <https://swumpf.com/pro800/>

Please go to the LOADER on the right side and import the file **VintageVision_CGMS_Bank_D.syx**

Alternatively you can use a MIDI SysEX dump program, which you can find for free on the internet, or your DAW with SysEx import.

Enjoy **VINTAGE VISION**
for the Behringer PRO-800.
