

# APP · SOUND

**MOTION X** is a collection of 80 new presets for the software synthesizer OB-Xa V by Arturia. You get a soundware which is carefully designed for spherical popular and electronic music. Actually, the presets are different from those of an analog synthesizer, they have their own sound and show some new tonal and rhythmic possibilities of the Arturia OB-Xa V for modern electronic music.

This soundbank takes advantage of the Modulation Lanes/Matrix and the effect sections. Most of the patches are a good starting point for your own sounds and are a good alternation to the includes sounds. The presets can be musically controlled by velocity and modulation wheel. Have fun creating new songs with these sounds for your Arturia OB-Xa V!

## CONTENT

80 presets featuring pads, fx, leads, basses and Impulses (by modulation lanes).

**Styles:** Ambient, Chill out, Retro, Pop, Electronic.

## HOW TO INSTALL

You get the product by mail / download link. The ZIP archive contains the folder „OB-XaV\_MotionX“ = the new sound data for your Arturia OB-XaV! Please launch the software instrument and use the function →IMPORT to import the new user bank / the file

„OB-XaV\_Bank\_AppSound\_MotionX.obxax“

After starting your DAW (Logic, Cubase, Live, etc.) again, you will see the updated sound content for your OB-Xa V. Now you can select the new preset bank in the browser → bank User-1.

Enjoy **MOTION X** for Arturia OB-Xa V!
