APP ▸ SOUND

Hydra Galaxy is a sound pack for the hardware synth ASM Hydrasynth (Keyboard and Desktop model). The 80 patches are very well suited for all kinds of spherical electronic and pop music. This collection shows some possibilities of wavetable synthesis and can be stylistically classified between classic synth sounds and modern electronic sounds. There are many spherical rhythmic sounds, which are produced with the arpeggiator and the LFOs.

All 80 sounds are carefully designed and take advantage of the complete synthesis engine and the effects of the ASM Hydrasynth (OS 1.4 or later). It's a good starting point for creating your own musical phrases and sequences. Let yourself be inspired!
