WAVE FORGE is a sound pack with 64 Presets for the Waldorf Iridium/Quantum series. Welcome to the colorful world of wavetables. With the Iridium, Waldorf offers the classic synthesis with PPG / Microwave wavetables that makes impressive use of this library. On offer are spherical pads, motion synths, arpeggiator phrases and other electronic sounds that you can control via Velocity, Aftertouch or Modwheel.

The presets are well playable on the keyboard and can be used musically more often universally. All sounds of WAVE FORGE are carefully designed. It's a good and inspirational starting point for creating pads and motion synths for your own tracks.

CONTENT

- Set of over 64 presets for the Waldorf Iridium/Quantum series
- Wavetable synthesis
- Pads, Soundscapes, Arpeggiator, Synths
- Styles: Electronic, Ambient and Pop

HOW TO INSTALL

You get the product by download link. The ZIP archive contains one folder („AppSound_WaveForge“) with 64 new presets.

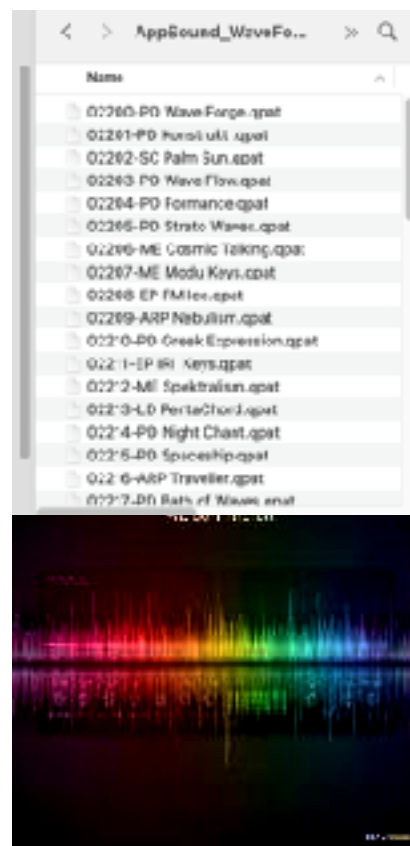

It's easy to install the sound pack: Copy the folder which contains the patches onto an SD card or USB stick. On your Waldorf synthesizer, press Load>Actions>Import. Navigate to the USB device and mark the entire folder (not the single patches) which contains the patches you want to import. Now the device asks where these files should go. Enter the number of the first slot where the files should be imported to. Press Import. The device now automatically imports all patches from the selected folder.

Enjoy **WAVE FORGE**
for the Waldorf Iridium
